

Are your students ready for what lies ahead?

your moneytrack

A Student's Real-life Guide to Financial Literacy

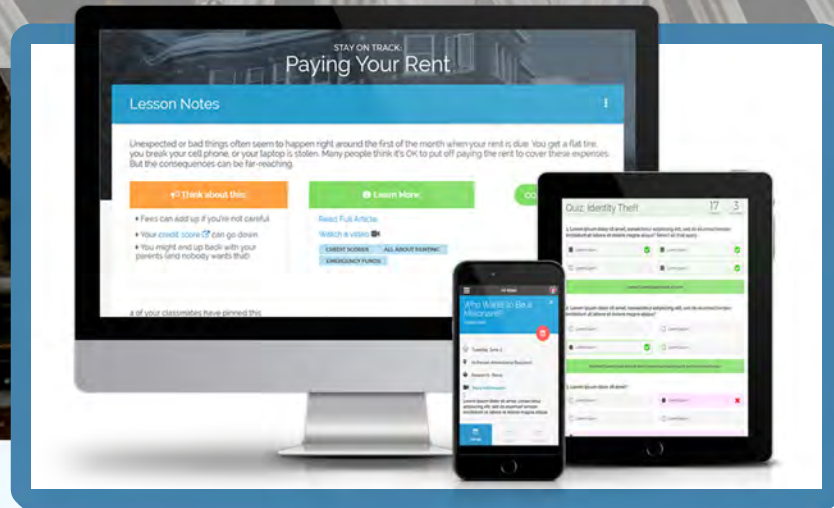

Place your students on the right financial track with web-based, engaging simulations, interactive real-life scenarios and educator customized lessons, insightful reporting, automated grading, and test generators.

They will learn to manage their own virtual households, employment, family dynamics, banking, loans, debt, expenses, investing, credit scores and more in real-time!

[life can be hard to navigate]

LET US HELP YOU FIND THE WAY

Your Money Track® is designed to help students gain comprehensive knowledge of varied financial literacy concepts. YMT understands that every student has a unique style of learning, and therefore, flexibility is key. Whether its banking, budgeting or credit, our true-to-life simulations offer a “learn-by-doing” approach that is sure to meet the needs of every learner.

What if you could offer students more than the definition of budget and instead, supply them the opportunity of working directly on **their personal budget** and even a **career choice**? Create an experience that students can navigate through a virtual life while making important financial decisions.

That is what YMT is all about, bringing learning to life with a revolutionary, gamified methodology that will engage the 21st century learner in the classroom, and prepare them for the road ahead.
